# Time Capsule

Imagine your school has decided to make a time capsule that will be buried somewhere under the school field so that a student in the long distant future can see what life was like for you at the moment when they dig it up.

---

**Your Computing entry to the 'time capsule project' is to:**

- Explain what is possible with Computing on earth at the moment
- Write about what you think will happen in the future

---

### **Success criteria:**

- I have presented my entry to the best of my ability
- I have used pictures to help explain what I am talking about
- I have given detailed explanations of what I am talking about someone in the future will understand eg. in the 1910s how would you have explained television?
- I have given my entry to someone else (who needs to pretend to be someone from the future) to see if they understand my explanations
