WHAT THE CSS MEANS (ALL OF WHICH SHOULD BE IN THE \<HEAD> SECTION OF YOUR WEBSITE)

\<style>	Tells your browser you are using CSS

ul {
   list-style-type: none;
   margin: 0;
   padding: 0;
   overflow: hidden;
   background-color: black;
}
	This section is for the navigation bar

li {
   float: left;
}
	This is where the links go on the navigation bar (Li means list)
	• You can choose the links to be on the left or right

li a, .navigationbarsection {
     display: inline-block;
     color: white;
     text-align: left;
     padding: 14px 16px;
     text-decoration: none;
     font-family: Arial, Helvetica, sans-serif;
     font-weight: bold;
 	
}
	This is the 'section' or 'category' on the navigation bar before you hover over it
	• Changing the **color** will change the colour of the text
	• You need the **padding** to give a space to the left and right of the word and it is measured in pixels
	• **Text decoration** could be underline but it does not look very nice!
	• **Font Family** is where the font used in the order given
	• **Font Weight** could be normal or bold

li a:hover, .navigationbar:hover .navigationbarsection { background-color: blue;}	This is about what happens when you hover over the navigation bar • You can change the colour of the 'highlight'

li.navigationbar {
   display: inline-block;
}
	This part is how the dropdown will appear
	• Keep this as an inline block

.navigationbar-dropdown {
     display: none;
     position: absolute;
     background-color: blue;
     min-width: 160px;
     box-shadow: 0px 8px 16px 0px
rgba(0,0,0,0.2);
}
	This is section is about what the dropdown part will look like
	• You could change the **background color** of the highlight
	• You could tweak the **min-width** to adjust the width of the dropdown part
	• You could add a **box-shadow** if you want the edge to stand out more
	• If you don't like the shadow you could delete the line and use **border-style: solid;** instead

.navigationbar-dropdown a {
   color: white;
   padding: 12px 16px;
   text-decoration: none;
   display: block;
   text-align: left;
   font-family: Arial, Helvetica, sans-serif;
   font-weight: bold;
}
	This section is about the colour of the hyperlinks on the dropdown part of the navigation bar
	• You need the **padding** to give a space to the left and right of the word and it is measured in pixels
	• **Text decoration** could be underline but it does not look very nice!
	• **Font Family** is where the font used in the order given
	• **Font Weight** could be normal or bold

.navigationbar-dropdown a:hover {background-color: white}	This section is the colour that highlights over the dropdown menu item your mouse is hovering over

.navigationbar:hover .navigationbar-dropdown {
   display: block;
}
	This section displays the highlight as a block of colour

\</style>	This is what you put at the end of your CSS code

What the HTML means (all of which should be in the <BODY> section of your website)

	This is the tag for an unordered (bulleted) list
HOME	This is the first menu item called HOME for the navigation bar – it has a hyperlink to index.html • You can change the **href** to a different page or website • You can change the text between **>** and **</A>** with what you want the menu to say
This goes to Google but has no dropdown	This is the next menu item and is just a hyperlink with n dropdown menu • You can change the **href** to a different page or website • You can change the text between **>** and **</A>** with what you want the menu to say
<div class="navigationbar-dropdown"> Google Bing	This is a dropdown menu where the first link does nothing (as it is the 'section') there are hyperlinks in a dropdown menu when you hover over the section • You can change the **href** to a different page or website • You can change the text between **>** and **</A>** with what you want the menu to say
<li class="navigationbar"> This is a link as are the links below <div class="navigationbar-dropdown"> Google Bing </div> 	This is a dropdown menu where the 'section' is a hyperlink and there are hyperlinks in a dropdown menu when you hover over the section • You can change the **href** to a different page or website • You can change the text between **>** and **</A>** with what you want the menu to say
	This ends the unordered list
